

NESCAFÉ Dolce Gusto

The best coffee in the blink of an eye!

How to use:

1. Fill the water tank with fresh water.
2. Turn on your NESCAFÉ Dolce Gusto machine. Wait until the red light stops flashing and turns green.
3. Pull the locking handle up.
4. Use the selection wheel to determine the water quantity. The water recommendation is written on the capsule.
5. Put the capsule in the capsule holder and close the handle (after closing the handle, do not open it until after the coffee has been prepared).
6. Confirm your choice by pressing the 'hot' button (or the 'cold' button if you are making a cold beverage).
7. The water supply will stop running automatically. Wait until the red light stops flashing. When the light is green, you can remove the capsule.
8. If you need a second capsule (for example cappuccino), repeat the process.
9. Enjoy your delicious coffee variety.
